NOTE FOR: [redacted]

Chief, Data Support Group

STAT

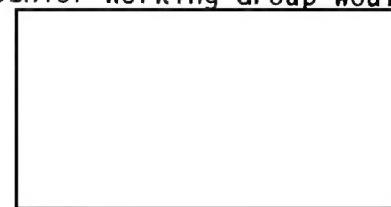

SUBJECT: Comparison of "Major Outputs"
with CIRIS Subjects

A couple of questions come to mind as a result of reading your memo:

1. The headings on both Tables 1 and 2 on CIRIS-relatable subjects seem to be scaled wrong. Are those dollars in thousands or something else?

2. How would the categories in which we gather the budget data spread themselves across either the OMB list or our list?

If you could look into number 2 and we could talk about it perhaps on Tuesday before sending out a memo to the PRC(I) Senior Working Group would be most helpful.
